Google / Coursera · 2023

MS Power BI Data Analyst
Microsoft PL-300 · 2024

SQL for Data Science
UC Davis / Coursera · 2023

Python for DS & AI
IBM / Coursera · 2024

PROFESSIONAL PROFILE

Results-oriented **Business & IT undergraduate** specializing in Business Analytics, pursuing a dual-degree education from **SLIIT** and **Rajarata University of Sri Lanka**. I bridge technical infrastructure with commercial viability — engineering data models, KPI dashboards, and automated reports that drive corporate decision-making. Proven track record in financial analysis, HR analytics, and econometric research.

EDUCATION

Bachelor of Business Administration (Hons.) — Business Analytics 2021 – 2025
SLIIT – Sri Lanka Institute of Information Technology
Predictive Analytics, Operations Research, ERP, Decision Science
🏆 Dean's List Recipient (3 Consecutive Semesters)

Bachelor of Science in Information Technology 2022 – Present
Rajarata University of Sri Lanka
Relational Databases, OOP (Python/Java), Data Structures, Systems Engineering, Cloud Infrastructure

PROFESSIONAL EXPERIENCE

Finance Intern Feb 2021 – Aug 2021
Sri Lanka Institute of Tourism & Hospitality Management (SLITHM)

- ▶ Automated monthly financial reports using macro-enabled worksheets, reducing compilation overhead by **15%**.
- ▶ Audited budget projections vs. actual expenditures across five regional campuses, noting key variances.
- ▶ Compiled metrics and seasonal parameters to refine baseline financial predictions for senior leadership.
- ▶ Drafted updated process mapping sheets and flow documentation to minimize transactional errors.
- ▶ Processed reconciliations between legacy ledger systems and operational balance charts.

KEY PROJECTS

LANGUAGES

Sinhala
English
Tamil

KPI Dashboard Development

Multi-page interactive sales/operational Power BI dashboard with Star Schema and automated ETL. Reduced reporting timelines by 40%.

Power BI DAX SQL Power Query

Tourism, Economic Growth & CO₂ Research

Econometric panel-data study on South Asian environmental curves. Accepted for publication at ICSDb 2025.

R Studio STATA Econometrics Panel Data

HR Attrition Prediction Model

Python ML classifier predicting workforce departure risks — 89% accuracy identifying commute & overtime as top indicators.

Python Scikit-Learn Pandas

Financial Reporting Dashboard

Excel automated dashboard parsing balance sheets and income changes. Saved 12 hours/month in ledger comparisons.

Excel Power Pivot VBA Macros
